**11β-Misoprostol**

*Catalog No. 13825*

**CAS Registry No.:** 58717-36-5  
**Formal Name:** 9-oxo-11β,16-dihydroxy-16-methyl-prost-13E-en-1-olic acid, methyl ester  
**MF:** C22H38O5  
**FW:** 382.5  
**Purity:** ≥98%  
**Stability:** ≥1 year at -20˚C  
**Supplied as:** A solution in methyl acetate

**Laboratory Procedures**

For long term storage, we suggest that 11β-misoprostol be stored as supplied at -20˚C. It will be stable for at least one year.

11β-Misoprostol is supplied as a solution in methyl acetate. To change the solvent, simply evaporate the methyl acetate under a gentle stream of nitrogen and immediately add the solvent of choice. Solvents such as ethanol, DMSO, and dimethyl formamide purged with an inert gas can be used. The solubility of 11β-misoprostol in these solvents is approximately 50 mg/ml in ethanol and DMSO and 100 mg/ml in DMF.

Further dilutions of the stock solution into aqueous buffers or isotonic saline should be made prior to performing biological experiments. Ensure that the residual amount of organic solvent is insignificant, since organic solvents may have physiological effects at low concentrations. If an organic solvent-free solution of 11β-misoprostol is needed, it can be prepared by evaporating the methyl acetate and directly dissolving the neat oil in aqueous buffers. The solubility of 11β-misoprostol in PBS (pH 7.2) is approximately 1.6 mg/ml. We do not recommend storing the aqueous solution for more than one day.

Misoprostol is a widely sold analog of PGE₁ which has potent but relatively non-selective agonist activity with respect to the prostanoid EP receptor subgroup.¹ Misoprostol has been used therapeutically for many years in humans for the treatment of gastric ulcer disease under the Searle tradename Cytotec.²

11β-Misoprostol is one of several impurities which are possible in the production of bulk commercial preparations of misoprostol, and is somewhat difficult to distinguish from other impurities such as 8-iso misoprostol.³

The pharmacology and EP receptor binding affinity for 11β-misoprostol have not been published.

**WARNING:** This product is not intended or approved for human or veterinary use. Use of this product for human or animal testing is extremely hazardous and may result in disease, severe injury, or death.

**MATERIAL SAFETY DATA**

This material should be considered hazardous until information to the contrary becomes available. Do not ingest, swallow, or inhale. Do not get in eyes, on skin, or on clothing. Wash thoroughly after handling. This information contains some, but not all, of the information required for the safe and proper use of this material. Before use, the user must review the complete Material Safety Data Sheet, which has been sent via email to your institution.

**WARRANTY AND LIMITATION OF REMEDY**

Cayman Chemical Company makes no warranty of any kind, expressed or implied, including, but not limited to, the warranties of fitness for a particular purpose and merchantability, which extends beyond the description of the chemicals on the face hereof, except that the material will meet our specifications at the time of delivery. Buyer’s exclusive remedy and Cayman Chemical Company’s sole liability hereunder shall be limited to refund of the purchase price of, or at Cayman Chemical Company’s option the replacement of, all material that does not meet our specifications. Cayman Chemical Company shall not be liable otherwise for or incidental or consequential damages, including, but not limited to, the costs of handling. Said refund or replacement is conditioned on Buyer giving written notice to Cayman Chemical Company within thirty (30) days after arrival of the material at its destination. Failure of Buyer to give said notice within said thirty (30) days shall constitute a waiver by Buyer of all claims hereunder with respect to said material.
