**WARNING**

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

**SAFETY DATA**

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the complete Safety Data Sheet, which has been sent via email to your institution.

**WARRANTY AND LIMITATION OF REMEDY**

Buyer agrees to purchase the material subject to Cayman’s Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.

**PRODUCT INFORMATION**

1a,1b-dihomo Prostaglandin F$_{2a}$

*Item No. 16050*

CAS Registry No.: 57944-39-5  
Formal Name: 1a,1b-dihomo-9a,11a,15S-trihydroxy-prosta-5Z,13E-dien-1-oic acid  
Synonym: 1a,1b-dihomo PGF$_{2a}$  
MF: C$_{22}$H$_{38}$O$_5$  
FW: 382.5  
Purity: ≥98%  
Stability: ≥1 year at -20°C  
Supplied as: A solution in methyl acetate

**Laboratory Procedures**

For long term storage, we suggest that 1a,1b-dihomo prostaglandin F$_{2a}$ (1a,1b-dihomo PGF$_{2a}$) be stored as supplied at -20°C. It should be stable for at least one year.

1a,1b-dihomo PGF$_{2a}$ is supplied as a solution in methyl acetate. To change the solvent, simply evaporate the methyl acetate under a gentle stream of nitrogen and immediately add the solvent of choice. Solvents such as ethanol, DMSO, and dimethyl formamide purged with an inert gas can be used. The solubility of 1a,1b-dihomo PGF$_{2a}$ in these solvents is approximately 100 mg/ml.

Further dilutions of the stock solution into aqueous buffers or isotonic saline should be made prior to performing biological experiments. Ensure that the residual amount of organic solvent is insignificant, since organic solvents may have physiological effects at low concentrations. If an organic solvent-free solution of 1a,1b-dihomo PGF$_{2a}$ is needed, it can be prepared by evaporating the methyl acetate and directly dissolving the neat oil in aqueous buffers. The solubility of 1a,1b-dihomo PGF$_{2a}$ in PBS (pH 7.2) is approximately 10 mg/ml. We do not recommend storing the aqueous solution for more than one day.

**Description**

1a,1b-dihomo PGF$_{2a}$ is the theoretical product of adrenic acid in the COX pathway.$^{1,2}$ 1a,1b-dihomo PGF$_{2a}$ is primarily produced in renal medulla where adrenic acid is selectively distributed.$^2$
