WARNING
THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

SAFETY DATA
This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the complete Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY
Buyer agrees to purchase the material subject to Cayman’s Terms and Conditions. Complete Terms and Conditions Including Warranty and Limitation of Liability information can be found on our website.

Undecanoic Acid
Item No. 19721

CAS Registry No.: 112-37-8
Formal Name: undecanoic acid
Synonyms: NSC 7885, Hendecanoic Acid, Undecylic Acid
MF: C_{11}H_{22}O_{2}
FW: 186.3
Purity: ≥95%
Supplied as: A crystalline solid
Storage: -20°C
Stability: ≥1 year

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Undecanoic acid is supplied as a crystalline solid. A stock solution may be made by dissolving the undecanoic acid in the solvent of choice. Undecanoic acid is soluble in organic solvents such as ethanol, DMSO, and dimethyl formamide (DMF), which should be purged with an inert gas. The solubility of undecanoic acid in ethanol and DMF is approximately 25 mg/ml and approximately 10 mg/ml in DMSO.

Undecanoic acid is sparingly soluble in aqueous buffers. For maximum solubility in aqueous buffers, undecanoic acid should first be dissolved in DMSO and then diluted with the aqueous buffer of choice. Undecanoic acid has a solubility of approximately 0.25 mg/ml in a 1:1 solution of DMSO:PBS (pH 7.2) using this method. We do not recommend storing the aqueous solution for more than one day.

Description

Undecanoic acid is a saturated fatty acid containing eleven carbons (C11:0). It is cytotoxic to certain filamentous fungi and is used to study fungal mechanisms of resistance.\(^1,2\) Undecanoic acid is also used to acylate larger molecules.\(^3\)
