CAS Registry No.: 111004-08-1
Formal Name: 9S-hydroperoxy-10E,12Z,15Z-octadecatrienoic acid
MF: C_{18}H_{30}O_{4}
FW: 310.4
Purity: ≥98%
Stability: 26 months at -80°C
Supplied as: A solution in ethanol
UV/Vis: λ_{max}: 236 nm; ε: 23,000

Laboratory Procedures
For long term storage, we suggest that 9(S)-HpOTrE be stored as supplied at -80°C. It should be stable for at least six months.

9(S)-HpOTrE is supplied as a solution in ethanol. To change the solvent, simply evaporate the ethanol under a gentle stream of nitrogen and immediately add the solvent of choice. Solvents such as DMSO and dimethyl formamide purged with an inert gas can be used. The solubility of 9(S)-HpOTrE in these solvents is approximately 50 mg/ml.

Further dilutions of the stock solution into aqueous buffers or isotonic saline should be made prior to performing biological experiments. Ensure that the residual amount of organic solvent is insignificant since organic solvents may have physiological effects at low concentrations. If an organic solvent-free solution of 9(S)-HpOTrE is needed, it can be prepared by evaporating the ethanol and directly dissolving the neat oil in aqueous buffers. The solubility of 9(S)-HpOTrE in PBS (pH 7.2) is approximately 1 mg/ml. Store aqueous solutions of 9(S)-HpOTrE on ice and use within 15 minutes of preparation.

9(S)-HpOTrE is a monohydroperoxy polyunsaturated fatty acid produced by the action of 5(S)-lipoxygenase on α-linolenic acid.\(^1\) It can be further metabolized to colnecenic acid by a divinyl ether synthase activity found in garlic and potato microsomal fractions.\(^2,3\) 9(S)-HpOTrE also serves as a substrate for further oxidation by both soybean and potato lipoxygenases, resulting in the 9,16-dihydroperoxy acid.\(^4,5\) The suicide inactivation of lipoxygenases when 9(S)-HpOTrE is used as a substrate is thought to occur via formation of an unstable epoxide.\(^6,7\)

\section*{MATERIAL SAFETY DATA}
This material should be considered hazardous until information to the contrary becomes available. Do not ingest, swallow, or inhale. Do not get in eyes, on skin, or on clothing. Wash thoroughly after handling. This information contains some, but not all, of the information required for the safe and proper use of this material. Before use, the user must review the complete Material Safety Data Sheet, which has been sent via email to your institution.

\section*{WARRANTY AND LIMITATION OF REMEDY}
Cayman Chemical Company makes no warranty or guarantee of any kind, whether written or oral, expressed or implied, including without limitation, any warranty of fitness for a particular purpose, suitability and merchantability, which extends beyond the description of the chemicals herein. Cayman warrants only to the original customer that the material will meet our specifications at the time of delivery. Cayman will carry out its delivery obligations with due care and skill. Thus, in no event will Cayman have any obligation or liability, whether in tort (including negligence) or in contract, for any direct, indirect, incidental or consequential damages, even if Cayman is informed about their possible existence.

This limitation of liability does not apply in the case of intentional acts or negligence of Cayman, its directors or its employees.

Buyer’s exclusive remedy and Cayman’s sole liability hereunder shall be limited to a refund of the purchase price, or at Cayman’s option, the replacement, at no cost to Buyer, of all material that does not meet our specifications.

Said refund or replacement is conditioned on Buyer giving written notice to Cayman within thirty (30) days after arrival of the material at its destination. Failure of Buyer to give said notice within thirty (30) days shall constitute a waiver by Buyer of all claims hereunder with respect to said material.

For further details, please refer to our Warranty and Limitation of Remedy located on our website and in our catalog.
